

Hydraulic Actuator AO-2GH

TOUGU DENKI Hydraulic Actuator consists of a motor, pump, tank and control valve for web guiding system. It is used on unwinding, rewinding, pivot guide and others by efficiency movements.

AO-2GH trace speed is 20 mm/s, and the allowable load is 3000 kg. It must work with a optional hydraulic cylinder, adjustment of cylinder diameter and stroke to the required.

Technical Data

Model	AO-2GH
Type	Hydraulic
Voltage	AC 3Ø 220V / 380V
Watt	0.37kW
Pressure	0~20 kg/cm ²
Oil	ISO VG 32 / 46 / 68
Oil Tank	10 L
Trace Speed	20 mm/s
Allowable Load	3000 kg
Weight	32 kg
Temperature	5~50℃

Hydraulic Actuator AO-2GH
is used on a Laminator for Unwinding
